# How We Can Help

ScholarStem helps local organizations launch technology classes in their after-school programs and beyond.

We develop effective training courses for your teachers and provide them with complete curricula\* so that your flashy new coding course can be up and running in under a month.

If you don't know whether to start with bits, bytes, or bandwidth, we're here to guide you. Read below about our tried and true zero-to-one training.

\*All our curricula is theory-driven, leveraging the latest research in project based learning (PBL).

# The Zero-to-One Experience

We take zeros and turn them into technology-teaching heroes!

(Seriously, no experience required!)

## How it Works:

### LEARN ON YOUR OWN TIME

Teachers learn with over 20 hours of interactive video, projects and quizzes. We've designed a flexible, month-long curriculum that works with most schedules.

### ONE-ON-ONE SUPPORT

Each teacher is paired with a ScholarStem moderator who will give live one-on-one support throughout the PD process.

### IMPLEMENTATION WORKSHOP

At the end of the month, your teachers may attend a full-day implementation workshop where we send an expert ScholarStem moderator to help your staff customize the curriculum to your school needs.

# Most Popular Courses

## 2D Coding and Gaming

Type: Software
